UX/UI Designer & Frontend Developer
combining a lifelong love of art with a new passion for **Visual design** and **Frontend development** to bring a unique voice with **limitless possibilities.**

EXPERIENCE

Mood | Mobile Application | View at hannahhill.design

Feb 2019 – Apr 2019

Created an application that prompts users to journal daily and analyze their emotions to easily track and manage their emotional health in today's mobile-centered world. Users record a journal entries by using emotion and associated color. Entries are stored in the user summary page where the year is displayed with all past entries as colors. Users can also view a monthly analysis of entered moods to quickly gauge how their month is going.

Dreamers | Web Application | View at hannahhill.design

Jun 2018 – Nov 2018

Designed a cloud-storage and organization application for everyone. Featuring 20GB of free secure cloud storage, the ability to upload files and images, download, edit, add and sort files using labels or folders, create documents, spreadsheets, notes, presentations, as well as share content and collaborate via video conference.

Portfolio | Mobile and Web Application | View at hannahhill.design

Nov 2018 – Feb 2019

Built a responsive portfolio website and designed a personal brand. Designed and solely coded a website portfolio that is fully responsive and renders correctly and cleanly on both mobile and desktop screen sizes. Personal branding elements were utilized throughout the design to complete a cohesive personal brand.

EDUCATION

Bloc.io | Remote

April 2018 - April 2019

UX/UI Designer Program, Certificate
